Indiana Child Welfare Information System (ICWIS) Overview

During 1995 and 1996, the Indiana Child Welfare Information System (ICWIS) was designed and developed. This system provides Indiana with child protection services intake capabilities as well as case management and administrative management capabilities. This statewide system allows the child welfare staff in local offices of the Department of Child Services to record all calls, whether for voluntary services or to take a report of a suspected case of child abuse or neglect. The system performs historical searches to identify prior involvement in child abuse or neglect, identifies types of service needed and potential service providers for those services. It records the relationships and roles of the individuals, records the types of abuse or neglect, and recommends to the local worker the time frames for response and the type of response to meet the situation.

Contained within the system are risk and strengths/needs assessment tools and a central statewide client index.

The technology provides a vehicle to record the processes and procedures used by both local and central office child welfare staff. This system promotes consistency of policy across the state in assessing risk for abused/neglected children, as well as matching resources to family needs more effectively. The system also provides strong security for the information it collects. Indiana has very specific confidentiality requirements, and the system enforces those requirements. This helps to prevent inappropriate sharing of abuse and neglect information.

Reporting

ICWIS provides data collection for the federal Adoption and Foster Care Analysis and Reporting System (AFCARS) and the National Child Abuse and Neglect Data System (NCANDS) reporting. ICWIS also provides statistical support for identification of services, as well as information that provides the opportunity to plan and target funding toward the development of needed services. ICWIS utilizes a point in time reporting format for the majority of the reports; however, real time data reports can also be generated.

History

In the mid-1990s, the federal government began requiring that all states implement an electronic method for their Adoption and Foster Care Analysis and Reporting Systems (AFCARS) reporting. Along with that requirement came federal funding, with the government reimbursing 75 percent of the costs to implement such a system. During 1995 and 1996, the ICWIS was designed and developed by UNISYS Corporation. The system was implemented in all 92 counties by March 1997. Each county worked from its own independent data system. Each night all 92 counties were uploaded to a centralized data system in Indianapolis to assure confidentiality of clients. In 2004 the data system was changed so the data from all counties were maintained in a centralized system in Indianapolis and no longer uploaded each night. This change was implemented to improve data security, reduce data loss, and reduce system maintenance costs. Application data access security insures confidentiality of clients in the centralized data system.

Technical Description

Originally, ICWIS was a three-tiered client/server application. An Ethernet LAN linked client workstations to county servers. Each county server was connected to the primary server in Indianapolis over a high-speed frame relay network. E-mail and bulletin board capabilities were available to all 1400 users. The system was an Oracle database using PowerBuilder screens on an IBM server using Microsoft NT or higher. The system is being redesigned and rewritten to use Microsoft .NET technology to enhance the screens and user interface while continuing to use the

Department of Child Services

Department of Child Services Demographic Trends Report State Fiscal Year 2006 and 2007

Oracle database. The redesigned system will be implemented using a phased approach throughout 2008.

Contracts

Unisys Corporation provides application maintenance, modifications, and enhancement service for ICWIS. Invoice is based on usage as defined in the contract.

Changes Affecting Data Collection Methods

Here is a list identifying some of the changes in the data collected over time. This will be helpful when viewing data for trend analysis. It may help explain some variances in the data from year to year and facilitate interpretation of the data. Understanding what the data is actually reflecting about program activity is crucial for program development and policy making.

- During 1995 and 1996 the ICWIS was designed and developed by Unisys Corporation.
- In March 1997 the system was implemented in all 92 counties. Each county works from an independent data system. Each night, data from all 92 counties is downloaded to a centralized data system in Indianapolis. The reason for the independent nature of the counties data systems is to ensure confidentiality of clients.
- Prior to 1996, abuse/neglect reporting was based on a hierarchy of abuse with sexual being the most severe followed by physical and last by neglect. That meant if a child suffered multiple types of abuse/neglect, only the single most severe type was reported. Due to a change in the federal reporting requirement in 1999, ICWIS was required to report all incidences of abuse/neglect so one child could potentially have multiple reports of abuse/neglect. Therefore, comparisons of data before and after 1999 are not feasible.
- There are two types of duplication possible in abuse/ neglect data. One is when the report of abuse/neglect can indicate more than one type of abuse/neglect, i.e., sexual abuse, physical abuse or some combination with neglect and the child is counted once for each type of abuse/neglect in the report. The other is when there is more than one report of abuse/neglect for a child in the year and the child is counted for each report, but only counted once under one category of abuse/neglect for each report.
- From 1997-1999, the counties did manual reporting as they transitioned into ICWIS. In 2000, an influx of transitional information was entered into the data reporting system. A policy directive mandated all child welfare workers to enter all their cases into ICWIS. This involved a massive effort to enter cases that were opened in previous years but not entered in ICWIS. So old cases, intakes, and investigations from 1997-1999 were entered into the system and reflected in 2001 data resulting in higher numbers reported for 2000-01.
- The indicated category was included in the abuse/neglect reporting from 1993 – 1995. The term “Indicated” was used when a child abuse and/or neglect report was made but there was insufficient evidence to substantiate or unsubstantiate the report. However, there was a reason to suspect the child may have been maltreated or was at risk for abuse and/or neglect. Indicated cases were included in the reporting of substantiated abuse cases from 1993 – 1995. The “indicated” status was discontinued in 1995. The inclusion of indicated cases with substantiated cases from 1993 – 1995 appears to have resulted in higher numbers of abuse being reported compared to subsequent years.

Prepared by:
Office of Data Management

Source:
Department of Child Services

Department of Child Services Demographic Trends Report State Fiscal Year 2006 and 2007

- As a result of passage of HEA 1194-2003, effective 7-1-04, the indicated status was again being reported.
- Abuse/neglect data on unsubstantiated investigations from 1997 - 2000 were expunged after six months, and aggregate numbers were not retained for these investigations for the years 1997 - 2000. This practice resulted in lower numbers being reported for unsubstantiated investigations for this period of time. Since 2000, aggregate data for unsubstantiated investigations has been collected and reported.
- ICWIS utilizes a point in time reporting format. A report is a snapshot of what is known on the last day of the month. Over the course of the year, the user makes updates and modifications to the data; so if pulled again, it reflects different information. A point in time average for a specified period of time can be calculated using the count of children at the end of each month divided by the number of months specified.
- Data within ICWIS is dynamic, which means that data changes day by day according to new data entries from the field. Thus, reports from ICWIS have the potential for showing different data from the same report if they are pulled after an update to the Central Database or to the databases of individual counties.
- Adoption data in ICWIS for 1990-2001 was based on numbers that were self-reported by local offices for all children in DCS custody who were adopted. Since this adoption reporting was done manually, the reliability of the data cannot be verified. ICWIS data does NOT include private adoptions. In 2002, a policy decision was made to discontinue use of manual reporting for adoptions, and rely solely on data entered into ICWIS for adoption counts.
- Prior to 10-15-04, institutional investigations were counted in Central Office. Since 10-15-03, institutional investigations have been counted in the county in which they occur.

Department of Child Services Description of Data Used in Trending Section

Comparison of Substantiated Abuse and Neglect Per Thousand Children Under Age 18

This data comes from the ICWIS Annual Report data report number 125 which summarizes the substantiated, indicated, and unsubstantiated reports by county. For the purposes of this report, it is using only the Substantiated column. Substantiations are then compared to the US Census estimates for persons under age 18. This number is determined by taking the July estimate for the beginning of each State Fiscal Year. For example, SFY 2002 uses the July 2001 estimates. This figure is the total population estimate minus the estimate for Age 18 and older.

The Substantiated number is divided by the Under Age 18 number. This will give the rate per person under age 18. This number is then multiplied by 1,000 to get the final rate per 1,000 person under age 18.

Average Monthly Total CHINS and Percent of Placement to Total CHINS

This data comes from the ICWIS internal CHINS JD/JS Reports. The average of each month for the period is calculated for each placement category and for total CHINS. These numbers are then compared by taking the average placement category number and dividing by the average total CHINS to obtain the percent of Placement Category to Total CHINS. The individual percentages will not total 100% due to rounding.

Total Reports Taken, Screen Outs, and Investigations Assigned

This data comes from the internal ICWIS report "Intake Statistics by County Reports". ICWIS rolls up aggregate data into these tables each month. The report totals each month's Reports Taken, Screen Outs, and Investigations Assigned. An Ad Hoc query is used to extract the data for the correct time period. The data for each fiscal year is summed to obtain the yearly numbers. Screen Outs and Investigations Assigned will not equal Total Reports Taken.

Removals by Category

This data comes from the ICWIS tables "Removal" and "Removal_Cond". The "Removal_Cond" table has indicator fields for each of the categories use in the breakdown. The category "Parent Drug / Alcohol Use" field is a combination of the indicator fields "DRUG_PARENT" and "ALCOHOL_PARENT". State fiscal year data is filtered using the "removal_dtm" field. The same removal may be counted in more than one category. Therefore, the sum of the categories will not equal the total removed.

Cases Closed by Closure Reasons

This data comes from the ICWIS table "CSCH_CSTP_STATUS" which has the closure reasons. For purposes of this report, the closure reasons were grouped into 8 categories. These are as follows:

Adoption – Child Adoption Finalized, Termination of Parental Rights
Emancipation – Child Reached Age of Majority (age 18), Emancipated Court Ordered (age 18),
Extended Wardship Terminated (on court order for age 18 to 21)
Guardianship – Case Closed; AG case created, Child Placed with Legal Guardian
NA – No reason code given

Department of Child Services

Description of Data Used in Trending Section

Other – CHINS being filed, Death of Child, IA closed; CHINS opened, Other, Runaway, wardship, Terminated

Relative – Child placed with relatives

Reunification – Case Informally Adjusted, Child Already Reunited with parent(s) when wardship terminated, Child never removed from own home, wardship terminated, Child Returned to Primary Home, Child Reunited with Parents, Period of IA ended code used for Informal Adjustment cases only, SRA completed

Transfer – Transfer to another agency

Closure error type reasons were filtered out. The last closure for each child case is counted during the year. Adoptions from cases closed by closure reasons will not match the adoptions data reported in the adoptions section of the D & T R because cases closed are self reported by the worker at the time the case is being closed. The adoption may not be finalized at this time. The adoptions data presented in the adoptions section of the D & T R is based on an adoption hearing with an order date.

Institutional Child Abuse and Neglect Reports State Fiscal Years 1996 to 2006

Data from 1996 to 1998 used Federal hierarchy. Each Investigation is counted in only one category per investigation.

From 1997 to 2000, unsubstantiated cases were expunged and no aggregate data was kept.

Data from 1999 to 2005 the same investigation may be counted in each category. So a case with Physical and Sexual Abuse may be counted twice in the abuse total.

Total		0	0	0	0	0	130	0	0	8	307	3	11	0	75

Table excludes private adoptions.

Children free for adoption are defined as children without finalized adoption who have an adoption case plan goal, have TPR, and have an adoption case type.

If there is an adoptive placement then those children free for adoption come under "Non-Finalized Adoptive Placement" Count.

Note: Adoptive placement is a placement where service code is "adoption" - not "substitute care".

Institutional Child Abuse and Neglect Reports State Fiscal Years 1997 to 2007

Data from 1996 to 1998 used Federal hierarchy. Each Investigation is counted in only one category per investigation.

From 1997 to 2000, unsubstantiated cases were expunged and no aggregate data was kept.

Data from 1999 to 2005 the same investigation may be counted in each category. So a case with Physical and Sexual Abuse may be counted twice in the abuse total.

Table excludes private adoptions.

Children free for adoption are defined as children without finalized adoption who have an adoption case plan goal, have TPR, and have an adoption case type.

If there is an adoptive placement then those children free for adoption come under "Non-Finalized Adoptive Placement" Count.

Note: H = Hispanic and Non = Non Hispanic

Note: Adoptive placement is a placement where service code is "adoption" - not "substitute care".

Child Support

Department of Child Services Demographic Trends Report State Fiscal Year 2006 and 2007

Indiana Support Enforcement Tracking System (ISETS) Overview

Project Description

The Indiana Support Enforcement Tracking System (ISETS) is a federally mandated online, automated, and integrated case management and case tracking software system. ISETS supports Clerks and Prosecutors in all 92 of Indiana's counties to record, track, collect, and disburse court ordered child support payments. In addition, the ISETS integrates with other systems, agencies, and employers to enhance locating and payment efforts. These include:

- Driver license suspensions;
- Employer wage and UI withholdings;
- TANF benefits recovery;
- Federal and State tax offset collections;
- Professional license suspensions; and
- Credit bureau reporting.

ISETS is used primarily by county workers in each county's Clerk of Courts office and Child Support Prosecutor's Office. There are approximately 84 State staff located centrally in the Child Support Bureau of the Department of Child Services that use the system for central office functions of processing payments, balancing adjustments, answering inquiry calls, correspondence, central registry cases, and enforcement activities.

A team of trained technical professionals monitor and maintain the ISETS software to ensure that it conforms to all Federal and State regulations, laws, and requirements. The data housed within ISETS is used to comply with Federal reporting requirements. The ISETS system achieved full Federal certification from the Office of Child Support Enforcement for both FS88 and PRWORA certification objectives in July, 2002.

History

In 1992, IBM won a competitive bid contract to transfer the KASES system from Kentucky, modify it to meet Indiana's needs, and implement it as the ISETS system. During the ensuing 8 years, IBM left the contract and other vendors worked to implement the system county by county. In October 1999, Marion County was the last county implemented thus completing the initial implementation of the system.

In 2000 and 2001, software modifications were completed to bring ISETS into full compliance with Federal certification requirements for both the FS88 and PRWORA legislations. Indiana formally received full Federal certification in March 2002, the first state in the Midwest region to accomplish this task, and only the 17th state nationally to do so. Certification is an important hurdle as it assures the State of continued federal matching funds of over \$10.5 M annually.

Numbers and profiles of population served: Approximately 747,800 Child Support Cases

The project is guided by goals to: maintain ISETS system in compliance with all Federal and State regulations, laws, and requirements; ensure that ISETS system retains its full Federal certification; successfully transition the maintenance and support contract from Covansys to Deloitte Consulting with minimal downtime; maintain all 92 County IV-D data on the ISETS system; implement enhanced financial audit ability and tracking changes as outlined by the Indiana State Board of Accounts EDP audit of 2000; and replace IBM OfficeVision/400 software, which is obsolete and no longer supported by IBM.

Department of Child Services Demographic Trends Report State Fiscal Year 2006 and 2007

The following are discretionary goals that are dependent upon funding: Enhance the employer payment Internet application to support more employers and to streamline reporting; significantly modify ISETS to take advantage of Internet and browser-based software to improve usability and to streamline operations; modify the ISETS statewide telecom network to facilitate the Courthouse Connectivity initiative of the Indiana Technology Oversight Commission; and Consolidate the 99 ISETS AS/400 computers centrally onto new hardware in order to significantly reduce maintenance and software licensing costs.

The Bureau of Child Support has cooperative agreements with 90 local county prosecutors that provide child support enforcement services in all 92 counties. Through this partnership, Indiana's children are getting more of the money they deserve. Enforcement efforts produced \$454,873,530 in distributed child support collections in state fiscal year 2004. Indiana's enforcement efforts are not only successful, but efficient as well. Indiana children receive more child support for every dollar spent on administrative costs than any other state. The April 2004 issue of Governing magazine recognized Indiana as the number one state in the nation in child support collections per dollar of administrative costs spent in federal fiscal year 2002. The national average was \$4.13. Indiana collected \$7.80 for every dollar spent in administrative costs designated to operate Indiana's Child Support Program. During SFYs 2006 & 2007, Indiana's enforcement efforts continued to result in more child support collections as reflected in the SFY 2006 \$509,830,408 and SFY 2007 \$529,844,379.
